Subject: Re: DTT Surveillance

I have never been so happy with the help I have been getting from DTT's customer service. As I am not computer savvy women, DTT's customer service was patient enough to take the time to teach me about their program so I could know step by step on how to use the camera and review film. I'm so relieve that i don't have to ask my teenagers to help me when working with DTT's program because after all the help from DTT's customer service I can actually teach my children on how to use the DTT's surveillance program now. Overall DTT's customer service is completely help when it comes to my needs and I'm never hesitant to call.

Installation was not a hassle like some business. DTT was focused on getting the job done right when it came to installing my surveillance camera in a secure location in my Subway Restaurant. I was so pleased with getting DTT installed in my first store I got them to install in my other two stores. The installer was very helpful explaining to what he was doing and what we'll need to do after the installation. I'd recommend anyone to get DTT surveillance in their Subway Restaurant or convince stores.
