I have DTT systems running in all three of my TCBY's. It's a great investment for a multi-unit franchisee or any franchisee that wants to know what really goes on in their stores when they are not present. I can't imagine a more efficient way to run more than one store without a tool like this. I monitor all my units from wherever I'm at to make sure everything is running properly. The POS interface has proven especially helpful in deterring theft and helping me to evaluate the honesty of my staff. I am sure it will reduce my food cost in the months ahead. Their 24 hour support and unlimited training has been outstanding.
