

Aileen,

Before switching over to DTT Surveillance I had a camera system that was mainly used as a deterrent. Because of the remote access capabilities; I use the system not only as a deterrent but to see who is working, who is wearing uniforms, and to see the general flow of the store. This allows me to schedule more efficiently which saves me money. I would definitely recommend DTT. It gives me peace of mind that I can leave the stores more often and without as many problems.
