

November 19, 2009

I was referred to DTT Surveillance through Subway Headquarters. In fact, when I first went to training in Milford, Connecticut I received a pamphlet. In addition, many of the people in my training courses have recommended DTT Surveillance to me.

When it came time to install a surveillance system I made sure to contact DTT. Hetel Patel and Nevil made sure I was able to get a system that matches my particular needs and fit within my budget.

The installers did an amazing and very clean job and anytime I had any problems there technical support staff was a phone call away.

The smartaudit system is also a great tool DTT offers. I receive helpful reports on a weekly basis that I share with managers and staff. It is an excellent theft deterrent because they are feeling that they could be being watched every possible moment.

The POS interface that was placed in my system has been a great tool as well. It allows me to assure employees are using the POS correctly and helps me have a much closer look even though I am not in the store.

I recommend DTT to all my friends and family members. Hetel and Nevil have been great and have helped me every step of the way.

Thank you.
