Merced Ca. 95348

To whom it may concern:

I have been a DTT customer for all most 4 years now and just recently installed a new system in my Merced store. Neviel (my customer service rep) was very help full and gave me the best deal possible to make this an affordable addition to my company. The install technician was very professional and helpful with all the details of the system and how it worked.

Before I installed the system we were rob twice in a two week period and since then almost 2 years we have not had one form of robbery or violence at my location. The system has also cleared employees of theft rather than convict them if it was not for the cameras. Unfortunately we have fired two people for theft of money and the DTT surveillance system help catch them.

I am a firm believer that DTT surveillance system is a great asset to my every day business and this is the easiest system to operate. I have also have had the local law enforcement compliment my system on the user friendly system and the features that are second to none.

Sincerely

C. G. Soza
