

To whom it may concern:

Nevil Desai sold us a security camera system for all four of my stores. The salesperson was helpful and was able to answer any questions that I had. The installation was quick and there was no problems installing the cameras. I had problems understanding the new security system and tech support was able to help me figure it out step by step. The POS interface has helped me lower my store's theft rate since I can conveniently see the cash register's screen and the order itself. Overall, it was a good experience and an improvement for my stores.

Sincerely,
