To Whom It May Concern:

We installed DTT Surveillance Systems in our restaurants almost a year ago, in this time our controllable cost such as food and labor have reduced significantly saving us over 1% in these areas. We have fired numerous employees and managers for theft. DTT surveillance has become an essential tool to our supervisors. They have found it extremely helpful in overseeing the restaurants. This tool allows us to improve operations and reduce cost from the comfort of our home. Their technical support team is always a pleasure to work with. We could always count on them to respond to any concern we may have in a prompt and professional manner. I would recommend DTT Surveillance to any business owner looking to cut losses and make the most out of their business. DTT is a true asset to our company.

Sincerely
