SUBWAY DEVELOPMENT OF BOSTON
WWW.SUBWAYDEVELOPMENTOFBOSTON.COM

We own 9 Subways and have 2 in construction that will be opening in February. We have used DTT for 5 years now and have their systems in all of our locations and will be ordering them for the 2 being build. We started with a local company in store #1 and quickly switched to DTT because they were approved by Subway. Their system is very easy to navigate and just as easy to teach to managers and area managers. We have had some issues with the help desk but they have significantly improved over the past 3 years. We view our cameras remotely and the help desk has been there to help out whenever we have issues remotely viewing. Sandra Martinez has been a pleasure to work with and has helped set up our past bunch of stores. She always answers her phone and gets back to me quickly with quotes or resolutions to any issues. We recommend DTT to all of our current and new franchisees.

A handwritten signature in black ink, appearing to read "Brooks Church".
