

Dear Sir or Madam:

DTT Surveillance, a highly experienced company is one of the leading suppliers of surveillance products. Providing 24/7 technical support, and having help just around the corner from Nevil Desai, one of many cultivated employees is always there for support. The sales process guided to us by Nevil Desai was excellent. He was very professional and followed up on the services he provided to us. The installation was done in a very timely fashioned manner. Having DTT in my store, has made my store a very safe and secure place. I trust DTT more than any other security service I've used in the past.
